EXPERIENCE

EduTrend | *Software Engineer Intern*

Nov 2025 - Present

- Built and maintained a cross-platform React Native component library in TypeScript, creating reusable UI components that standardized design patterns and improved development efficiency
- Authored and maintained developer documentation for 20+ UI components, improving onboarding and enabling faster adoption of the internal design system
- Implemented GraphQL mutation workflows for dynamic form submissions, connecting configurable React Native input schemas to backend operations and reducing duplicate submission logic across 10+ data-entry features

One Community Global | *Volunteer Software Engineer*

Sept 2025 - Present

- Reviewed and tested 20+ GitHub pull requests across community portal features, validating functionality, edge cases, accessibility, and alignment with project requirements
- Developed responsive frontend features using React, JavaScript, HTML, CSS, and CSS Modules, improving usability, readability, and layout consistency across user-facing pages
- Debugged and refactored React components by resolving pagination, filtering, rendering, dark mode, and layout issues, improving maintainability and reducing user-facing UI bugs

Trendsetter Media & Marketing | *Software Engineer Intern | Freehold, NJ*

May - Nov 2021

- Delivered 6+ features in agile sprints using React, Next.js, TypeScript, Node.js, PostgreSQL, and SQL, collaborating through Git and GitHub
- Engineered a reusable Snackbar system with React Context and custom hooks, reducing repeated notification logic and improving consistency across authenticated user flows
- Developed and documented a Storybook component library with 20+ components, improving component reuse and frontend development speed
- Increased test coverage by 5% and helped prevent regressions by adding automated tests with Cypress, Jest, Mocha, React Testing Library, and GitHub Actions CI/CD

PROJECTS

Job Tracker | [GitHub](#)

- Developed a full-stack job tracking application using React, Node.js, and Express.js, enabling automated job data collection and form population from job posting sites
- Built an Express.js backend that uses Cheerio to scrape job titles and company names from external URLs, integrates with the frontend to autofill forms, and exports entries to Excel
- Wrote comprehensive unit tests (Jest) and end-to-end tests (Playwright), achieving 70%+ code coverage across the app, tracked with Codecov

EDUCATION

Formation | *Remote (US)*

May 2022 - March 2026

Software Engineering Fellowship

Rutgers, The State University of New Jersey | *Somerset, NJ*

Feb - Aug 2019

Full-Stack Software Development Bootcamp

Bergen Community College | *Paramus, NJ*

Sept 2016 - May 2018

Associate of Applied Science in Information Technology, Web Development

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL, Java

Frontend: React, React Native, Next.js, React Context, Storybook

Backend: Node.js, Express.js, GraphQL, PostgreSQL, Cheerio

Testing: Jest, Playwright, Cypress, Mocha, React Testing Library

Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), Codecov
